Welcome!

If you are in the process of having your child apply to one or more of the independent schools around the world that rely on the Secondary School Admission Test (SSAT) as an admission assessment tool, this guide is for you.

This is an exciting time in your child’s academic life, and we have designed this guide to help demystify the testing process. As you read through this document, you’ll find an overview of the individual test sections, sample problems, and answers to frequently asked questions.

Please contact us if you have questions or concerns—like you, we want your child to feel confident and well prepared.

Sincerely,

Heather Hoerle,
Executive Director and Chief Executive Officer
The Enrollment Management Association
What is the SSAT?

The Elementary Level SSAT is a paper-based admission assessment designed for students seeking entrance to private and independent schools worldwide. The SSAT measures the basic verbal, quantitative, and reading skills students develop over time, which are necessary for successful performance in these schools. The SSAT provides school admission professionals with meaningful information about the possible academic success of potential students at their institutions, regardless of background or experience.

The SSAT is not an achievement test. A classroom math test, for example, is an achievement test designed by the teacher to evaluate how much students know about what they covered in class. The SSAT, on the other hand, is designed to measure the verbal, quantitative, and reading skills acquired instead of focusing on mastery of particular course materials.

How is the SSAT Designed?

The SSAT measures three constructs: verbal, quantitative, and reading skills that students develop, both in and out of school. It emphasizes the critical thinking and problem-solving skills that are essential for academic success.

The SSAT is constructed to be of middle difficulty for those who take the test. The distribution of question difficulties is set so that the test will effectively differentiate among test takers, who vary in their level of skills.

In developing the SSAT, review committees composed of content experts and independent school teachers are convened. The committees reach consensus regarding the appropriateness of the questions. Questions judged to be acceptable after the committee review are then pretested and analyzed. Questions that are statistically sound are assembled into test forms. New questions are constantly being tested to ensure the tests remain current. These questions appear in the experimental section of the test.

Is the Elementary Level SSAT Reliable?

The SSAT is very reliable. The scaled score reliability is higher than or close to .85 for all three measures, which is considered high in the educational field.
The SSAT is a Norm-Referenced Test

The SSAT is a norm-referenced test. A norm-referenced test interprets an individual test-taker’s score relative to the distribution of scores for a comparison group, referred to as the norm group. The Elementary Level SSAT norm group consists of all the test takers (same grade) who have taken the test for the first time in the United States and Canada in the last three years.

The SSAT reports percentiles, which are referenced to the performance of the norm group. For example, if you are in the third grade, and your percentile on the verbal section is 90%, it means that the scores of 90% of all the other third grade students (who took the test in the preceding three years) fall at or below your score. The same scaled score on the SSAT may have a different percentile from year to year.

In contrast, a criterion-referenced test interprets a test-taker’s performance without reference to the performance of other test takers. For example, if your percent correct from a classroom math test would be 90% if you answered 90% of the questions correctly. Your score is not referenced to the performance of anyone else in your class.

It is important to remember that the SSAT norm group is highly competitive. Students are being compared to all the other students in the same grade who are taking this test for admission into independent schools, which can be quite selective and competitive. Most important to remember is that the SSAT is just one piece of information considered by schools when making admission decisions and, for the vast majority of schools, students with a wide range of SSAT scores are admitted.

The SSAT is a Standardized Test

Although each year several different SSAT forms are administered, the SSAT is administered and scored in a consistent (standard) manner. The reported scores (or scaled scores) are comparable and can be used interchangeably, regardless of which test form students take. A scaled score of 500 on the December 2018 Elementary Level third grade verbal section, for example, has the same meaning as the scaled score of 500 on the March 2019 Elementary Level third grade verbal section, although the forms are different. Score interchangeability is achieved through a statistical procedure referred to as score equating. Score equating is used to adjust for minor form difficulty differences, so that the resulting scores can be compared directly.

Standard also refers to the way in which tests are developed and administered. A standard process for writing, testing, and analyzing questions—before they ever appear on a live test—is used. Precise instructions are provided to qualified and experienced test administrators from the moment students are admitted to the test center until the time of dismissal. Any deviations from the uniform testing conditions are reported by the test administrator. Of course, a student may apply for testing accommodations, but the processes and procedures for the test’s administration remain the same.
SSAT Testing Levels

There are currently three testing levels for the SSAT. The Elementary Level tests are for students in grades 3 and 4. Because of the learning and growth that takes place during the third and fourth grades, separate tests are constructed for each grade. The Middle Level is for students in grades 5-7. The Upper Level is for students in grades 8-11.

Elementary Level Overview

The **Elementary Level SSATs** are multiple-choice admission tests that consist of five sections plus a break, given in this order:

<table>
<thead>
<tr>
<th>Section</th>
<th>Number of Questions</th>
<th>Time Allocated to Administer Each Section</th>
</tr>
</thead>
<tbody>
<tr>
<td>Section 1 (Quantitative)</td>
<td>30</td>
<td>30</td>
</tr>
<tr>
<td>Section 2 (Verbal)</td>
<td>30</td>
<td>20</td>
</tr>
<tr>
<td>Break</td>
<td></td>
<td>15</td>
</tr>
<tr>
<td>Section 3 (Reading)</td>
<td>28</td>
<td>30</td>
</tr>
<tr>
<td>Writing Sample</td>
<td>1 prompt</td>
<td>15</td>
</tr>
<tr>
<td>Experimental Section</td>
<td>Varies from 15-17</td>
<td>15</td>
</tr>
<tr>
<td>Totals</td>
<td>104–106*</td>
<td>2 hours, 5 minutes</td>
</tr>
</tbody>
</table>

*Depending on the number of questions in the experimental section.

Most test booklets are barcoded with information identifying your child, including registration ID, name, grade, and gender. Your child marks answers directly in the test book by filling in the circle next to his/her answer choice.
The Quantitative Section

The quantitative section of the third-grade test consists of thirty quantitative problems. These problems are a mixture of concepts considered the basis of the third-grade mathematics curriculum and a few that will challenge third-grade students. Topics include number sense, properties and operations, algebra and functions, geometry and spatial sense, measurement, and probability. These problems reflect the following skills:

- Basic addition, subtraction, multiplication, and division
- Place value
- Ordering of numbers (greater than, less than)
- Fractions
- Basic concepts of geometry (shapes and their attributes)
- Basic concepts of measurement
- Interpretation of graphs

Just the Facts

The Quantitative Section

Number of questions: 30
Scored section: Yes
Time allotted: 30 minutes
How are the Quantitative Questions Presented on the Test?

EXAMPLE: 1. The Smith family drove 300 miles every day for 4 days. How far did they drive on their trip?

Ⓐ 75 miles  
Ⓑ 304 miles  
Ⓒ 600 miles  
Ⓓ 1,200 miles  
Ⓔ 1,500 miles

Option Ⓞ is correct. Option ₋ is incorrect because the student divides rather than multiplies. Option ₋ is incorrect because the student adds rather than multiplies. Option Ⓒ is incorrect because the student doubles but does not multiply by four. Option ⎎ is incorrect because the child multiplies by 4 and adds in the 300 again. This question tests basic multiplication skills, and as it is a word problem, it does not specifically state the mathematical operation necessary to solve it. The student’s task is also to consider the information in the problem in order to determine what operation is necessary to solve the problem.

EXAMPLE: 2. \( \frac{1}{4} + \frac{1}{2} = \)

Ⓐ \(\frac{2}{2}\)  
Ⓑ \(\frac{2}{4}\)  
Ⓒ \(\frac{3}{4}\)  
Ⓓ \(\frac{2}{6}\)  
Ⓔ \(\frac{2}{8}\)

Option Ⓒ is correct. Option ₋ is incorrect because the student added the numerators and ignored the first denominator. Option ₋ is incorrect because the student added the numerators and ignored the second denominator. Option Ⓓ is incorrect because the student added the numerators and then the denominators. Option ⎎ is incorrect because the student added the numerators and multiplied the denominators. This question tests basic addition skills as well as facility with fractions. It is structured in the terms that directly state the mathematical operation necessary to solve it.
The Verbal Section

The verbal section of the test has two parts. The first is a synonym section, and the second is an analogies section. These sections test understanding of language, word relationships, and nuances in word meanings.

Synonyms

Synonyms are words with the same or nearly the same meaning as another word. The words do not need to have exactly the same meaning; therefore, learning synonyms enables students to differentiate between shades of meaning. This allows them to be more precise in their own speech and writing and to understand subtleties in the speech and writing of others. For example, large and big are synonyms, as are beautiful and pretty. The test focuses on vocabulary appropriate to the third grade, pulling words from all areas of third-grade study, including science, technology, and social studies.

How are the Synonym Questions Presented on the Test?

<table>
<thead>
<tr>
<th>EXAMPLE:</th>
<th>1. COLD:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Ⓟ kind</td>
</tr>
<tr>
<td></td>
<td>Ⓠ sick</td>
</tr>
<tr>
<td></td>
<td>Ⓡ chilly</td>
</tr>
<tr>
<td></td>
<td>Ⓢ light</td>
</tr>
<tr>
<td></td>
<td>Ⓣ hot</td>
</tr>
</tbody>
</table>

Option Ⓡ chilly is the correct answer. Option Ⓟ can be the opposite of someone who acts cold. Option Ⓠ may describe someone who has a cold, but it is not a synonym of cold. Option Ⓢ is not related to describing temperature. Option Ⓣ is an antonym of cold.

<table>
<thead>
<tr>
<th>EXAMPLE:</th>
<th>2. COOPERATE:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Ⓟ join</td>
</tr>
<tr>
<td></td>
<td>Ⓠ help</td>
</tr>
<tr>
<td></td>
<td>Ⓡ delay</td>
</tr>
<tr>
<td></td>
<td>Ⓢ finish</td>
</tr>
<tr>
<td></td>
<td>Ⓣ substitute</td>
</tr>
</tbody>
</table>

Option Ⓠ help is the correct answer. Option Ⓟ is a synonym for a similar word. Option Ⓡ is an antonym. Option Ⓣ is connected to the correct answer, cooperating helps finish, but is not a synonym. Option Ⓢ is incorrect because the meaning is “to use in place of another.”
Analogies

An analogy is a statement saying that one thing is similar to another thing. Analogies help us make connections and see relationships based on our knowledge. These comparisons are essential in improving problem-solving and decision-making skills, perception and memory, communication, reasoning, reading, and vocabulary. Analogies help students to process information actively, make important decisions, and improve understanding and long-term memory. The relationships stimulate critical and creative thinking. These questions require the student to demonstrate an understanding of nuances in both word meanings and word relationships.

Examples of Common Categories of Analogies:

- **Opposites or antonyms**: up is to down as short is to tall
- **Synonyms or words with identical or similar meanings**: big is to large as little is to small
- **Characteristic**: pillow is to soft as blanket is to warm
- **Part to whole**: trunk is to tree as stem is to flower
- **Uses**: broom is to sweep as pencil is to write
- **Users**: hammer is to carpenter as brush is to painter
- **Category**: robin is to bird as shark is to fish
- **Product to Producer**: poem is to poet as statue is to sculptor
- **Degree**: snow is to blizzard as rain is to hurricane
- **Homonyms**: four is to for as see is to sea
How are the Analogy Questions Presented on the Test?

The classic approach to figuring out analogies is the “bridge sentence.” The student looks at the question pair (below it is “minute is to hour”) and decides what the connection is between the two words. In the example below, the connection is part to whole, so the bridge sentence might be “a minute is part of an hour.” Then, the student looks at the options and turns them into the same bridge sentence. The student does this with each word pair until the sentence makes sense.

### EXAMPLE:

1. Minute is to hour as
   - A. men is to our
   - B. week is to day
   - C. cow is to milk
   - D. month is to year
   - E. man is to woman

The correct answer is D. The relationship is part to whole and a month is a part of a year. Option A is wrong because the two words sound similar to the stem, but have no connection. Option B is a similar relationship but is going in the other direction (a week has a day in it, instead of day being a part of a week). Option C is incorrect because a cow produces milk. Option E is incorrect because man and woman are opposites.

### EXAMPLE:

2. Bare is to bear as pause is to
   - A. jaws
   - B. laws
   - C. caws
   - D. paws
   - E. cause

Option D is the correct answer. The relationship is one of homonyms. All of the other options are rhymes, not homonyms.
The Reading Section

The reading section of the third-grade test consists of six to seven short, grade-level appropriate passages, each with four to six multiple-choice questions associated with it. These passages may include biographies, prose, poetry, fiction, and nonfiction. Students are asked to locate information and find meaning. They are also asked to demonstrate literal, inferential, and evaluative comprehension. Questions ask the reader to show understanding of key ideas and details to determine the text’s main idea. Additionally, they ask the reader to determine the meaning of words and phrases as they are used in a text, distinguishing literal from non-literal language.

How are the Reading Questions Presented on the Test?

<table>
<thead>
<tr>
<th>EXAMPLE:</th>
<th>Butterflies go through a complete metamorphosis in four different life stages. The butterfly starts its life as an egg. It hatches from an egg as a caterpillar. While it is in its larva stage, it constantly eats leaves or flowers. The caterpillar molts many times as it grows, losing its old skin again and again. The caterpillar turns into a chrysalis. It rests while it is in this stage. Finally, a beautiful, ready-to-fly adult butterfly emerges.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Line 5</td>
<td>In line 4, the word “molts” can be replaced by</td>
</tr>
<tr>
<td>🅶️</td>
<td>dies</td>
</tr>
<tr>
<td>🅷️</td>
<td>flies</td>
</tr>
<tr>
<td>🅸️</td>
<td>rests</td>
</tr>
<tr>
<td>🅹️</td>
<td>sheds</td>
</tr>
<tr>
<td>🅺️</td>
<td>hatches</td>
</tr>
</tbody>
</table>

Option 🅷️ sheds is the correct answer. The word is explained by the second clause of the sentence. Option 🅶️ is not mentioned in the text. Options 🅷️, 🅸️, and 🅺️ are all verbs used in other stages of the life cycle of the butterfly. This question asks the student to show understanding of the meaning of words and phrases as they are used in a text.

2. The main point of the passage is that butterflies
   🅴️ are beautiful
   🅵️ are the same as a caterpillar
   🅶️ eat a lot of leaves and flowers
   🅷️ cannot fly until they are fully grown
   🅸️ change completely in each stage of life

Option 🅴️ is correct. The remaining options are all true but clearly are not the main point of the passage. This question asks the student to show understanding of key ideas and details to determine the main idea of the text.
The Writing Sample

The writing sample allows students to express themselves through a written response to a picture prompt. The SSAT asks students to look at a picture, tell a story about what is happening, and make sure their story includes a beginning, a middle, and an end. The writing sample is not graded, but a copy is provided to the schools that receive your child’s score report.

How Is the Writing Sample Presented on the Test?

Look at the picture and tell a story about what happened. Make sure your story includes a beginning, a middle, and an end.

<table>
<thead>
<tr>
<th>Look at the picture and tell a story about what happened. Make sure your story includes a beginning, a middle, and an end.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Look at the picture and tell a story about what happened. Make sure your story includes a beginning, a middle, and an end.</td>
</tr>
<tr>
<td>Look at the picture and tell a story about what happened. Make sure your story includes a beginning, a middle, and an end.</td>
</tr>
<tr>
<td>Look at the picture and tell a story about what happened. Make sure your story includes a beginning, a middle, and an end.</td>
</tr>
<tr>
<td>Look at the picture and tell a story about what happened. Make sure your story includes a beginning, a middle, and an end.</td>
</tr>
</tbody>
</table>
The Experimental Section

The experimental section of the third-grade test contains mixed content questions (verbal, reading, and math). This section does not count toward reported scores.

What it Measures

The SSAT assessment development team continuously tests new questions for possible future use on the SSAT to ensure they are reliable, suitable, and acceptable.

Note: Testing accommodation students requiring 1.5x time do not complete the experimental section.

Just the Facts

The Experimental Section

- Number of questions: Ranges from 15 to 17
- Scored section: No
- Time allotted: 15 minutes
Elementary Level Scoring

Your child’s Elementary Level SSAT score report will contain the following information:

- **Number of Items**: The number of items in the content sections and subsections.
- **Number Correct**: The number of correct answers for the content sections and subsections.
- **Percent Correct**: The percentage of correct answers for the content sections and subsections.
- **Scaled Score**: A score that has a range of values from 300 to 600.
- **Scaled Score Percentile**: The scaled score percentile is a score that has values from 1 to 99. It compares performance to other students taking the same examination.
- **Total Scaled Score**: The total scaled score is the sum of the scaled scores for the (quantitative, verbal, and reading) sections. It has a minimum value of 900 and a maximum value of 1800.

Score Reporting Services

A free copy of your child’s score report will be available online via your SSAT account. For an additional fee, you may receive score reports by mail or FedEx or get a text or email alert when your child’s scores are ready.

Helpful Tips

The best way to help your child prepare for the Elementary Level SSAT is to review the test format beforehand, including layout, structure, instructions, and time allotment. Looking at practice questions together is an excellent way to demystify the process.

In the days leading up to the test, ensure your child gets adequate rest. Provide a healthy breakfast on the test day and encourage your child to bring a break-time snack and drink.

Be careful not to add unnecessary stress. While it’s always important to encourage your child to do their best, avoid overemphasizing the importance of the test.

Be sure to remind your child to listen carefully to the test administrator, who will provide all the instructions to take the test successfully.

There is no penalty for incorrect answers on the Elementary Level SSAT, so students should guess on questions where they are unsure.

If your child is sick on test day, you have up to one week after the scheduled test date to book a seat for another date (if available). A change fee applies.

Contact Us

If you need assistance or have additional questions, please contact us Monday–Friday, 9:00 a.m. to 5:00 p.m. ET at 609–683–4440 or info@ssat.org.
Frequently Asked Questions

How do schools use my child’s scores?
Schools use your child’s scores in different ways—to estimate your child’s ability to succeed in their programs, to compare your child’s performance with other applicants for admission, and to compare the test score with your child’s current academic record. Each school evaluates a child’s scores according to its standards and requirements. Specific questions about how they use test scores in the admission process should go to the school’s admission officer.

Are testing accommodations such as extra time available for the Elementary Level SSAT?
Yes, families who can provide documentation verifying that their child routinely receives accommodations in their current academic setting may apply for testing accommodations. Accommodations must be approved before test registration.

Are snacks or drinks allowed on the day of the test?
Yes, your child may bring snacks and beverages for consumption during the break. Snacks and drinks should be in a clear plastic bag and may not be consumed during testing.

Can my child use the restroom during the test?
Students receive a 15-minute break during the test for using the restroom. A child may raise their hand to use the restroom during the test but cannot make up for the missed testing time.

Should my child guess if they don’t know the answer?
Encourage your child to try to answer every question, making their best guesses on the questions where they are unsure. There are no penalties for incorrect answers.

How do I report my child’s scores to schools?
You may indicate the school’s name as a score recipient during test registration, or you can wait to receive your child’s scores before designating score recipients through your online SSAT account.

Are fee waivers available for the Elementary Level SSAT?
Yes, you may request a fee waiver from a school where your child is applying. A fee waiver covers the cost of the test only and is entered in place of a credit card during registration. Fee waivers are not available directly from The Enrollment Management Association and must be obtained before test registration.
Practice Questions

These practice questions simulate those on the test and are formatted exactly as in the actual test book. Students mark answers directly in the test book by filling in the circle next to their answer choice.

The practice answer key is on page 31.

Please note that this practice is not the same length as the SSAT third-grade test.
SECTION 1
15 Practice Questions

Following each problem in this section, there are five suggested answers. Select the best answer from the five choices. You may use the blank space provided to solve the problem.

Sample Question: \[34 - 13 = \boxed{}\]

1. \[922 - 157 = \]
   \[\boxed{A} \ 753\]
   \[\boxed{B} \ 765\]
   \[\boxed{C} \ 776\]
   \[\boxed{D} \ 835\]
   \[\boxed{E} \ 1079\]

2. Veronica and Sam found 83 pebbles to use in their aquarium tanks. They place 37 of the pebbles in the tadpole tank. How many do they have left to put into their salamander tank?
   \[\boxed{A} \ 46\]
   \[\boxed{B} \ 47\]
   \[\boxed{C} \ 54\]
   \[\boxed{D} \ 55\]
   \[\boxed{E} \ 56\]

3. On a map, 1 inch represents 150 miles. If I measure 4 inches on the map, how far is that in miles?
   \[\boxed{A} \ 400 \text{ miles}\]
   \[\boxed{B} \ 450 \text{ miles}\]
   \[\boxed{C} \ 500 \text{ miles}\]
   \[\boxed{D} \ 550 \text{ miles}\]
   \[\boxed{E} \ 600 \text{ miles}\]
4. If one banana weighs 8 ounces, how much do 4 bananas weigh?
   - 12 ounces
   - 16 ounces
   - 22 ounces
   - 32 ounces
   - 40 ounces

5. A box holds 8 chocolate candies. How many boxes are needed to hold 136 chocolate candies?
   - 14
   - 15
   - 16
   - 17
   - 18

6. $58 \times 37 =$
   - 580
   - 1,916
   - 2,146
   - 3,448
   - 18,796

7. Which is the largest fraction?
   - $\frac{1}{2}$
   - $\frac{1}{3}$
   - $\frac{1}{5}$
   - $\frac{1}{10}$
   - $\frac{1}{100}$

8. $\frac{2}{4} + \frac{5}{12}$
   - $\frac{7}{24}$
   - $\frac{6}{14}$
   - $\frac{7}{16}$
   - $\frac{7}{12}$
   - $\frac{11}{12}$
9. Sam's birthday is 2 weeks and 2 days from today. If today is January 2nd, on what day is Sam's birthday?
   A. January 9
   B. January 11
   C. January 16
   D. January 18
   E. January 22

10. Find the perimeter for the shape.
    A. 30
    B. 35
    C. 40
    D. 45
    E. 50

11. Lily wants to buy a notebook that costs $3.50. She only has $2.45. Which coins could you give Lily so she would have exactly $3.50?
    A. 1 nickel
    B. 2 quarters and 1 nickel
    C. 3 quarters and 2 dimes
    D. 4 quarters and 1 nickel
    E. 4 quarters, 1 dime, and 1 nickel

12. Omar and Zahir have 427 paperclips in their collection. They traded 259 of their paperclips to their sister for 27 pencils. How many paperclips do the boys have now?
    A. 168
    B. 172
    C. 232
    D. 238
    E. 286
13. What is the total number of cupcakes sold on Day 1 and Day 3?

Ⓐ 25
Ⓑ 35
Ⓒ 55
Ⓓ 60
Ⓔ 75

14. What was the average temperature of these five cities on November 1?

<table>
<thead>
<tr>
<th>City</th>
<th>Temperature</th>
</tr>
</thead>
<tbody>
<tr>
<td>Miami</td>
<td>90°</td>
</tr>
<tr>
<td>Atlanta</td>
<td>82°</td>
</tr>
<tr>
<td>Seattle</td>
<td>65°</td>
</tr>
<tr>
<td>Portland</td>
<td>63°</td>
</tr>
<tr>
<td>Chicago</td>
<td>45°</td>
</tr>
</tbody>
</table>

Ⓐ 45°
Ⓑ 65°
Ⓒ 67°
Ⓓ 69°
Ⓔ 86°

15. 17 + 6 =

Ⓐ 20
Ⓑ 22
Ⓒ 23
Ⓓ 24
Ⓔ 26
SECTION 2
14 Practice Questions

Synonyms

Each of the following questions consists of one word followed by five words or phrases. You are to select the one word or phrase whose meaning is closest to the word in capital letters.

Sample Question:

SLEEPY:
Ⓐ perky
Ⓑ fast
Ⓒ tired
Ⓓ sad
Ⓔ hungry

1. DIFFICULT:
Ⓐ soft
Ⓑ hard
Ⓒ light
Ⓓ gentle
Ⓔ simple

2. FRANTIC:
Ⓐ inferior
Ⓑ worried
Ⓒ reluctant
Ⓓ paranoid
Ⓔ depressed

3. FRIGHTFUL:
Ⓐ horrible
Ⓑ deceitful
Ⓒ vengeful
Ⓓ shameful
Ⓔ spectacular

4. BRIEF:
Ⓐ hide
Ⓑ long
Ⓒ short
Ⓓ secret
Ⓔ manuscript

5. ADMIRE:
Ⓐ crave
Ⓑ pretty
Ⓒ desire
Ⓓ delight
Ⓔ appreciate

6. UNUSUAL:
Ⓐ bad
Ⓑ native
Ⓒ regular
Ⓓ abnormal
Ⓔ appropriate

7. EDIT:
Ⓐ reuse
Ⓑ revise
Ⓒ reduce
Ⓓ referee
Ⓔ redefine

Sample Question:

SLEEPY:
Ⓐ perky
Ⓑ fast
Ⓒ tired
Ⓓ sad
Ⓔ hungry

A  B  ●  C  D  E
Analogies

The following questions ask you to find relationships between words. For each question, select the answer choice that best completes the meaning of the sentence.

Sample Question:

Book is to author as
Ⓐ clay is to sculptor
Ⓑ hammer is to carpenter
Ⓒ song is to composer
Ⓓ script is to actor
Ⓔ microphone is to singer

Choice Ⓕ is the best answer because a book is written by an author, just as a song is written by a composer. Of all the answer choices, Ⓕ states a relationship that is most like the relationship between book and author.

8. Listen is to music as
Ⓐ ball is to bat
Ⓑ choir is to sing
Ⓒ floor is to mop
Ⓓ read is to book
Ⓔ laundry is to wash

9. Wheat is to bread as milk is to
Ⓐ cow
Ⓑ goat
Ⓒ drink
Ⓓ white
Ⓔ cheese

10. Happy is to sad as
Ⓐ up is to top
Ⓑ hop is to pop
Ⓒ run is to skip
Ⓓ talk is to chat
Ⓔ laugh is to cry

11. Sun is to hot as ice is to
Ⓐ cold
Ⓑ snow
Ⓒ cubes
Ⓓ skating
Ⓔ slippery

12. Blue is to color as
Ⓐ human is to hair
Ⓑ pillow is to sleep
Ⓒ flower is to grass
Ⓓ paper is to pencil
Ⓔ rabbit is to animal

13. Pane is to pain as weigh is to
Ⓐ ton
Ⓑ way
Ⓒ scale
Ⓓ weight
Ⓔ pounds

14. Find is to lose as build is to
Ⓐ wood
Ⓑ create
Ⓒ misplace
Ⓓ demolish
Ⓔ materials
SECTION 3
12 Practice Questions

Read each passage carefully and then answer the questions about it. For each question, decide on the basis of the passage which one of the choices best answers the question.

In Winter I get up at night
And dress by yellow candle light.
In Summer, quite the other way,
I have to go to bed by day.
I have to go to bed and see
The birds still hopping on the tree,
Or hear the grown-up people’s feet
Still going past me in the street.
And does it not seem hard to you,
When all the sky is clear and blue,
And I should like so much to play,
To have to go to bed by day?

1. Why does the author say he gets up at night in the winter?
   A. He goes to night school.
   B. In the winter, it’s warmer at night.
   C. He works an overnight shift in a factory.
   D. In the winter, it is still dark in the morning.
   E. His mother sleeps all day because of her job.

2. We can assume that the poem was not written recently because
   A. the sky is still clear and blue
   B. he has to dress by candlelight
   C. his parents make him go to bed early
   D. the author can hear people in the street
   E. there are birds on the trees outside of his window

3. Why does the author have to go to bed when he thinks it’s still day?
   A. He isn’t allowed to play with the people who are still outside.
   B. He has to get up very, very early the next morning.
   C. He has misbehaved and is put to bed early.
   D. It is evening though not yet dark.
   E. He has been sick.

4. The author is unhappy about when he goes to bed in the summer because
   A. he isn’t tired
   B. he wants to play
   C. he wants to catch birds
   D. he can’t sleep unless it’s dark
   E. the people walking outside keep him awake
When the girl was brought to the king, he led her into a room that was entirely filled with straw. Giving her a spinning wheel, he said, “Get to work now. If by morning you have not spun this straw into gold, then you will have to go and live in the tower.” Then he locked the room, and she was there all alone.

The poor miller’s daughter sat there. She had no idea how to spin straw into gold. She began to cry.

Then suddenly the door opened. A little man stepped inside and said, “Good evening, why are you crying so?”

“Oh,” answered the girl, “I am supposed to spin straw into gold, and I do not know how to do it.”

The little man said, “What will you give me if I spin it for you?”

“My necklace,” said the girl.

The little man took the necklace, sat down before the spinning wheel, and whir, whir, whir, three times pulled, and the spool was full. So it went until morning, and then all the straw was spun, and all the spools were filled with gold, and the little man had vanished.

5. What did the king want the miller’s daughter to do?
   A. spin the straw into gold
   B. hand over the necklace
   C. fill the room with straw
   D. make the little man vanish
   E. stop the little man from crying

6. The word that best describes the king is
   A. mean
   B. tricky
   C. boring
   D. nervous
   E. sneaky

7. The girl was crying because she
   A. was alone in the room
   B. could not unlock the door
   C. could not see the little man
   D. wanted to keep her necklace
   E. could not turn straw into gold

8. What does the word “vanished” mean?
   A. disappeared
   B. finished
   C. helped
   D. called
   E. cried
Five cents doesn’t buy you much these days, but the 1913 Liberty Head nickel is worth a fortune. Just ask the family of George Walton. A month after Paul Montgomery, a coin collector in New Hampshire, offered a one million dollar reward for the 1913 Liberty Head nickel—one of the rarest American coins—the Walton family came forward and said that they thought they owned one.

The family had put the coin away after Walton’s death in 1962, believing the nickel was worthless. But after learning of the offer, the family decided to see if their nickel was genuine. Experts determined it was.

The story of the Liberty Head nickel began in 1883. That’s when the U.S. Mint began producing the coins. In 1912, the mint replaced the Liberty Head nickel with the Indian Head, or Buffalo, nickel. But in 1913, someone—probably an employee of the U.S. Mint—illegally minted five additional Liberty Head coins.

Two of the rare 1913 nickels are now owned by coin collectors, and two others are in a museum. What happened to the fifth one remained a mystery until now.

“It’s been missing for so long,” said coin dealer John Dannreuther. “People would say there are only four, but we knew there were five. And there it is.”

9. The main idea of this passage is
Ⓐ people like to collect coins
Ⓑ the U.S. Mint makes coins with pictures
Ⓒ five extra 1913 Liberty Head nickels were made
Ⓓ the fifth 1913 Liberty Head nickel is found
Ⓔ coin collectors offer a lot of money for rare coins

10. If someone illegally made five 1913 Liberty Head nickels, they made them
Ⓐ for government officials
Ⓑ as examples for museums
Ⓒ to sell only to coin collectors
Ⓓ at the request of the U.S. Mint
Ⓔ without permission of the law

11. According to the passage, another name for the Indian Head nickel is the
Ⓐ 1913 nickel
Ⓑ Walton nickel
Ⓒ Buffalo nickel
Ⓓ Liberty Head nickel
Ⓔ Dannreuther nickel

12. In the last paragraph of the passage, we can assume that John Dannreuther feels
Ⓐ tired
Ⓑ pleased
Ⓒ uncertain
Ⓓ thoughtful
Ⓔ disappointed
Look at the picture and tell a story about what happened. Make sure your story includes a beginning, a middle, and an end.

Test Day Checklist

✓ Arrive at the test site no later than 30 minutes before the exam to allow time for check-in.

✓ Have your admission ticket printed or displayed on your phone for fast entry to the test site.

✓ Review the Test Irregularity Policies (included with your admission ticket) to inform yourself of possible unusual circumstances and outcomes.

✓ Follow the proctor’s instructions on where to go and sit.

✓ Listen carefully to the proctor’s instructions as the exam begins and throughout the test.

✓ Remember all the useful tips you learned in this guide.

Relax and good luck!

What to Bring

• SSAT admission ticket (paper or digital)
• Several (at least 3) sharpened #2 pencils with erasers
• A snack and beverage for the break (in a clear bag or container)

What NOT to Bring

Clothing
• Coats
• Hats
  Hooded sweatshirts may be worn; however, the hood must remain down at all times.

All Electronics
• Calculators
• Cell Phones*
• Fitness Tracker
• Wristbands
• Media Players
• All Watches
• Computers,

Tablets, etc.
• Backpacks
• Bags
• Large Jewelry
• Purse

Other Items
• Books
• Erasers
• Mechanical Pencils
• Notes or Paper
• Pens
• Rulers

*It’s best to leave your cell phone at home, but if you need to bring it, you must turn it off and give it to the proctor before testing begins. It will be returned to you following testing.
